

Maryland 2010 Census Hard to Count Areas in 2002 Legislative District 46

As Ordered by the Court of Appeals June 21, 2002 (Amended July 1, 2002)
Baltimore City

The HTC map classifies census tracts by how hard or easy they will be to count in the upcoming census. Tracts which are projected to be the most difficult to count had low mail back rates in the prior census and/or have other demographic and socioeconomic factors associated with being difficult to count.
