Larry:

Thank you for the courtesy of your this afternoon. It was a pleasure discussing the window clings with you.

As I explained, the department, along with the Office of the Secretary of State and the Governor's Office on Community Initiatives are coordinating the Governor's census 2010 Outreach Campaign. This involves the partnership of every State executive and independent agency.

I am writing to request permission for all participating State agencies to affix the Census 2010 vinyl cling decal on their fleet vehicles. This decal does not have an adhesive backing and clings to the inside of the vehicle's glass. Therefore there is no residue left after the decal's useful time is over and it is removed.

Attached please find a jpeg of the decal design. The actual size of the decal is 5" in diameter. I will drop an actual cling in an interagency envelope and send to you for inspection. Of course, feel free to affix it to your vehicle of choice.

Sincerely,

John
